

800T5

2-line speakerphone with 5 programmable speed dial keys

Highlights

- 2-line speakerphone
- 5 speed dial keys
- Available in Ash and Black
- National account package pricing
- 12 phones per case

800 Series

Smart line-powered 800 Series telephones with patented one-touch voice mail retrieval integrates two U.S. patents for design and function. The integrated message waiting lightbar functions as both a speed dial key and message retrieval system. A single touch of the blinking lightbar simultaneously turns on the speakerphone and speed dials the guest into their hotel guestroom voice mailbox. Printed in-room dialing instructions are no longer required. 800 Series 2-line models are equipped with electronic line selection, a smart dataport that finds the open line, and EEPROM memory that eliminates the need for batteries.

Design

- Full-length printable faceplate area for hotel guest or general user instructions
- Reduced telephone footprint saves space
- Easy-to-dial rounded keys
- Elegant styling
- Wall mount kit sold separately

Volume/Ringer

- 4-step volume control
- ADA-compliant volume control
- HI/LO ringer control

Feature Keys

- Volume control toggle key
- Hands-free speaker key
- Adjustable Flash and Pause time keys
- Conference key
- Mute key
- Redial key
- Programmable hold key

Operation

- 5 programmable speed dial keys
- Line powered, requires no batteries to maintain speed dial key programming
- Patented one-touch voice mail retrieval lightbar automatically dials voice mail box and turns on speakerphone
- Electronic line selection automatically locates the open voice or data line
- Dual NEON/LED message waiting light operates with popular PBX models without modification
- Smart dataport automatically finds the open line
- Line upgrade switch hidden beneath the telephone faceplate, upgrades the phone from a 2-line to 3-line with a dedicated dataport in the room
